About the Company

Headquartered in Sunnyvale, California, SST designs, manufactures and markets a diversified range of memory and non-memory products for high volume applications in the digital consumer, networking, wireless communications and Internet computing markets. Leveraging its proprietary, patented SuperFlash technology, SST is a leading provider of nonvolatile memory solutions with product families that include various densities of high functionality flash memory components. The Company also offers its SuperFlash technology for embedded applications through its broad network of world-class manufacturing partners and technology licensees, including TSMC, which offers SuperFlash under its trademark Emb-FLASH. SST's non-memory products include Flash microcontrollers and radio frequency ICs and modules. Further information on SST can be found on the company's website at **www.SST.com.**
